90-DAY PLAN · WEEK BY WEEK

From listed to pipeline.

The 12-week plan I run with coaching clients to turn a quiet listing into a working demand and co-sell motion. Three phases: **fix the foundation, build demand, co-sell & scale.**

12 weeks

3 phases

A Friday output each week

From **Ron Davis** — 8 years inside AWS Marketplace · From listed to bought.

// HOW TO RUN THIS

One focus per week, one output by Friday — don't run phases in parallel. **Get found and choosable before you spend a dollar driving traffic**, and have traffic before you lean on co-sell. Each week pairs with a free tool from the resources library (canvas, checklist, templates). Drop this into Notion and check off the outputs.

PHASE 1 · DAYS 1–30 — FIX THE FOUNDATION

WEEK

1

Baseline & ICP

Score your listing with the Listing Optimization Canvas and the Agent-Ready checklist. Tighten the ICP to one role, one trigger.

By Friday: a scorecard + a one-paragraph ICP.

WEEK

2

Rewrite the listing

Outcome-first title, ≤280-char short, structured long description, and the search terms to claim.

By Friday: paste-ready listing copy, live.

WEEK

3

Pricing & proof

Run the Pricing Story Worksheet — value metric, package ladder, narrative — and add real proof (numbers, logos, outcomes).

By Friday: a pricing story on the listing.

WEEK

4

Procurement & agent-readiness

Clear security/contract blockers; make pricing, specs, and terms machine-legible.

By Friday: a listing a human can choose and an agent can parse.

WEEK

5

Pick the wedge

One ICP, one outcome, one proof asset. Write the campaign thesis: for [ICP], [outcome], proven by [proof].

By Friday: a one-sentence thesis you can defend.

WEEK

6

Stand up a destination

A place attention compounds — newsletter, content hub, or community — with one clear next step on every surface.

By Friday: a live destination + capture.

WEEK

7

Launch the content sequence

A 4-beat run: POV → proof → offer → co-sell. Channel, asset, and exact hook for each.

By Friday: the first 3 posts + 1 email, live.

WEEK

8

Measure & cut

Define the one metric that says it's working. Kill what isn't; double the one thing that is.

By Friday: a dashboard line — listing → pipeline.

// THE DISCIPLINE THAT MAKES THIS WORK

One focus a week. One output by Friday. No parallel phases.

The plans that fail try to do everything at once. The listing has to be choosable before traffic helps, and there has to be traffic before co-sell has anything to convert. Sequence is the strategy.

WEEK 9	ACE & the field Register your first opportunities and hand the field a 30-second pitch (use the Co-sell / ACE template). By Friday: 3 ACE opportunities + a rep intro.
WEEK 10	First co-sell motions Outreach to reps / PDM framed to their incentive; map which deals fit committed-spend. By Friday: one joint call booked.
WEEK 11	Private offers & expansion Build a private-offer path; find expansion inside the buyers you already have. By Friday: one private offer issued.
WEEK 12	Systematize Document the motion so it runs without you. Schedule the standing 30/60/90 review. By Friday: a repeatable playbook.

Track these the whole way.

PHASE	THE ONE NUMBER	HEALTHY SIGNAL
1 · Foundation	Listing score	Up and to the right week over week; no empty fields.
2 · Demand	Listing visits	A repeatable source of traffic you can name and grow.
3 · Co-sell	Qualified pipeline	ACE opportunities moving stage, not just registered.

// AT DAY 90

Re-score the listing, read the one number from each phase, and commit next quarter's bets. The motion should now run on a cadence, not on heroics — and the listing should be getting **found, chosen, and bought** without you in every loop.

Run the 90 days with me.

This plan is the backbone of the coaching engagement. If you'd rather not run it solo, book a free 30-minute call — we'll set your Phase 1 baseline together and decide whether you're better off with the templates, the Foundry, or hands-on coaching.
